### Dear Well-Wishers!

Greetings form V.O.C College of Education.

VOCCE is a premier in teaching. It has got its tradition of 69 years experience in this field. It has produced many good teachers who are all over the country. They are the torch bearers of our college. Teachers are the future architect of any society. They not only teach the future generation but also mould and shape the future character of the nation. A Teacher can transform the society better than any other professional. He is the only professional who is having the direct contact with the youth. The youth are always impressed, influenced and motivated only by the teachers.

A teacher should be a towering personality not in terms of Physical stature but in terms of mental power. For that, teachers should equip and empower themselves. The difference between the teacher and the student is a day of learning. Teacher learns earlier then, the student grasps the theme of the subject, analyse it and presents it according to the level of the student. Our college provides opportunities for the overall development of the personality of the future teacher.
